

Acme Cloud - Billing and Plans

This document explains the available plans, how to upgrade, and how billing works.

Plans

Acme Cloud offers three plans. Free includes 5 GB of storage for a single user. Team adds shared drives, 1 TB per user, and admin controls. Business adds SSO, advanced audit logs, and unlimited version history.

Upgrading your plan

1. Open Admin Settings and select Billing.
2. Choose the Team or Business plan and the number of seats.
3. Enter a payment method (credit card or invoice for annual plans).
4. Confirm; the new plan takes effect immediately and is prorated.

Invoices and payment methods

Invoices are issued monthly or annually and are available under Billing > Invoices as PDF downloads. You can add multiple payment methods and set one as the default. Annual plans can be paid by bank transfer.

Cancelling or downgrading

You can downgrade or cancel at any time from Billing. Your plan remains active until the end of the current billing period, after which storage above the new limit becomes read-only until you remove files.
